

BIG BRUISER

Giant Odor Killing Block

- 👍 Helps Eliminate foul odors, leaving a fresh fragrance
- 👍 24 Hour Coverage
- 👍 Long-Lasting
- 👍 Strong Enough to handle the big odor problems

This 20 pound block is effective in large areas where odors can be a problem. It is widely used in sewerage treatment plants, manholes, elevator shafts, out houses and in large public facilities.

DIRECTIONS

Unwrap block, attach a rope to the eyebolt and suspend above the source of the odor.

Out House (pit toilet)- Suspend Giant Block 1-2 Ft. above the highest water level achieved before pumping, (toward the middle of the area being treated- but not where water will be running on it)

High Rise Building (garbage shut collection in basement)- Partially unwrap block to achieve desired odor control. Suspend block above the dumpster.

Sewer Use- Suspend Giant Block at least 2 feet under manhole cover.

NOTE: Giant Block only works when there is air circulation around the block. Do Not place Giant Block in water - it will not achieve desired performance.

COMPOSITIONAL INFORMATION:

Contains: Paradichlorobenzene

C-600-20
