

# BREAK DOWN

## Bacterial Enzyme Digestant Deodorant

- Live Bacteria - Digests Grease And Organic Waste
- Cleans And Deodorizes Destroys Uric Acid Soils And Other Malodors
  - Safe / Non-Acid, Non-Caustic, Non-Toxic, Enviro-Conscious, Non-Pathogenic, Non-Corrosive, Biodegradable
- Certified Salmonella-Free

Our liquid Life Forms is a live, bacterial suspension which attacks solids such as grease, fats, proteins, and carbohydrates, instantly destroying malodors by eliminating the source. No environmental harm... digest grease and waste nature's way.

### DIRECTIONS

**Initial Treatment** — pour 1qt. into drain closest to trap, prior to its longest non-use period. For maintenance purposes, use 4 oz. daily. (Large traps may require additional amounts).

**Sink Drains, Wash Basins, Shower Stalls, Bathtubs...** Use 1-4 oz. weekly.

**Uric Acid Odor Neutralizer...** Vigorously attacks and destroys uric acid and other malodors.

**Refuse Containers...** Superb for deodorizing kennels, cigarette urns, bed pans, and similar places where foul odors are present.

**Septic Tanks...** To promote bacterial digestion add 16 oz., of Break Down for each 500 gallons of capacity.

**Recreational Vehicles & Marine Holding Tanks...** Add 1-3 oz. per gallon of liquid in holding tank.

**Porta-Toilets & Outhouses...** Add 16-128 oz. to solids to deodorize and aid in digestion.

**Lagoons...** 8-32 oz. for each 10,00 gallon capacity. The amount can vary depending on equipment and condition of lagoon.

**Tile Field...** After tank has been treated, add 64-128 oz. to distribution box. Depending on condition of field.

**Beak Down** is very resistant to hot temperature (140-212 Degrees F), and even after activating, they can protect themselves by formation of a biological film on the inside of a drain line.

**BACTERIA:** Aerobic, Anaerobic, Facultative.

**ENZYMES PRODUCED:** Proteolytic, Amylolytic, Lipolytic and Cellulolytic.

### CAUTION: KEEP OUT OF THE REACH OF CHILDREN

Although this product contains no acid, caustic or solvent, it cannot be taken internally. If taken internally get immediate medical attention. Wash hands after prolonged contact with product. For accidental eye contact, flush with water for 15 minutes.

**CONTAINS:** Water (CAS# 7732-18-5), Bacteria Cultures (No CAS#), Suspension Aid (CAS# 26027-38-3).

**CAUTION:** Store in a Cool Area. See MSDS for complete safety information.
